

FEEDERS

All of our feeders have a hutch-card holder along the back panel of the feeder and are made with 28-gauge galvanized steel. **Feeder Covers Sold Separately (see Page 25).** In proper installation with rabbits, the bottom of the feeder should be 4" above the wire floor for commercial size breeds, and 2" for miniature breeds.

SAVE FEED!
Rabbits will waste less food with a metal feeder than with a crock or bowl.
